

EZ blender™ —Versatile, Smart, and Priced Right!

*No other commercial blender in this price range offers the features of the EZ blender™.*

## *Versatile*

Thick milkshakes. Frozen coffees. Fruit smoothies. Blended bar drinks. The options with the EZ blender™ are endless. Power to crush ice and frozen fruit in seconds. Unique blade design unlocks the flavors of every ingredient you blend. Compare the texture of a drink made in the EZ blender™. Smooth as you choose—the result of 3 peak horsepower, precision engineering and advanced blade design.

## *Smart*

The EZ blender™ is so smart it adjusts to your specific blending needs in seconds. Choose from 30 pre-programmed blend profiles to automatically blend smoothies, frozen coffees or other frozen delights. Assign your selection to the touchpad and with the single touch of a button the blender completes a cycle of changing blade speeds and shuts off automatically. Product consistency is assured—saving time, reducing food costs, and best of all—increasing profits!

## *Functional Design*

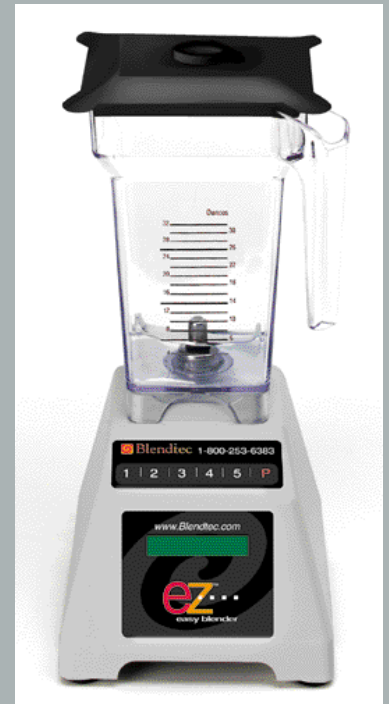

The EZ blender™ was designed for low volume operations incorporating design features of more expensive machines. For starters, the EZ blender™ fits in a small space. Next, add the best jar design on the market. Tough GE Lexan™ jars are stackable and feature easy-to-read measuring marks. And while they hold a true half gallon, they're shorter and half the weight of other jars with comparable volume. Ergonomically designed jar allows 3-directional pouring. Jars may be personalized with your logo. Liquid Crystal Display reports cycle counts and other helpful diagnostics.

*Versatile, smart, functional. No greater value for the price!*
