Open Display – VASC Economy  
VASC 36 - Digital

Project Name: \_\_\_\_\_  
Location: \_\_\_\_\_  
Item #: \_\_\_\_\_ Qty: \_\_\_\_\_

## SPECIFICATION

### CABINET CONSTRUCTION

- The cabinet interior and exterior is 26 gauge Black or white metal.
- Metal tested to NSF splash zone requirements.
- Strong one piece body design incorporates 14 gauge G90 outer bottom.
- Cabinets are all steel construction with foamed in place, moisture impervious polyurethane insulation.

### LIGHTED SIGN

- Large lighted display area.
- Supplied with lighting white Acrylite 3mm thick Plexiglas.
- All cabinets are same sign dimension to ensure consistency when lining up multiple cabinets.

### INTERIOR LIGHTING

- Fluorescent interior lighting.
- Plastic safety shield protects bulb.
- Cool white bulbs highlight your product presentation.

### SHELVING

- Cabinets supplied with four heavy duty shelves
- NSF approved white epoxy coated shelves.
- Steel pilaster strips allow for adjustment of shelves in 1/2" increments
- Four zinc coated steel clips are supplied per shelf ( VASC 36 , VASC 48)
- Five zinc coated steel clips are supplied per shelf ( VASC 60 , VASC 72)

### DIGITAL CONTROLER

- XR 40 C Dixell temperature controller ensures accurate temperature control.
- Control also ensures correct air defrost cycles to eliminate coil icing conditions.

### CONDENSATE REMOVAL SYSTEM

- Hot gas self-contained condensate removal system ensures effective removal of water buildup from coil without the use of a drain.
